

Public Statement from Morton County Health System

Morton County Health System and ACPHealth are appreciative of the strong partnership shared over the past several years. Throughout this collaboration, ACPHealth played a key role in strengthening the organization and supporting its long-term success.

During the partnership, ACPHealth recruited and brought in five Board-Certified Emergency Medicine physicians, significantly enhancing clinical quality and provider stability. ACPHealth also provided essential leadership and expertise in guiding Morton County Health System through its successful conversion to Critical Access Hospital status. In addition, ACPHealth supported multiple operational improvements across the organization and helped strengthen the hospital's financial position.

Now that the hospital is back on solid footing, ACPHealth has formally handed the helm back to the Morton County Health System Board as of August 2025. The Board has resumed full management and governance responsibilities for the hospital, and both organizations move forward with mutual respect and appreciation for the work accomplished together.

Morton County Health System extends its sincere gratitude to ACPHealth for its commitment, professionalism, and partnership.
